SUMMARY

Software engineer and final-year Computer Science student. Two years building ERP modules in ASP.NET Core and Angular used by more than 100 people. Works across the stack: REST APIs, SQL Server, Angular front ends, automated tests and CI.

EXPERIENCE

Awatech Technology Solutions **Sep. 2025 – Present**
Software Engineer *Lahore, Pakistan*

- Develop ERP modules end to end for more than 100 active users: REST API endpoints in ASP.NET Core, Angular forms and dashboards, and SQL Server schema migrations.
- Optimise queries and application performance through structured debugging.
- Track and resolve vulnerable front-end dependencies, and keep Angular upgrades and builds stable.
- Ship through pull requests and code review. Retained after the internship below, alongside final-year studies.

Awatech Technology Solutions **Jul. 2024 – Aug. 2025**
Software Development Intern *Lahore, Pakistan*

- Built CRUD applications with .NET and Angular: API endpoints, data-entry forms, validation and SQL Server integration, in a Git workflow with pull requests.

Allied Software Engineers (Pvt) Ltd **Jul. – Aug. 2026**
Cyber Security Intern *Remote*

- Eight-week programme in vulnerability assessment, security monitoring and incident response; wrote detection rules (Sigma, YARA) and Linux audit scripts for a lab scenario.

Petsaal Technologies **Sep. – Dec. 2022**
SEO Intern *Lahore, Pakistan*

- Technical and on-page search optimisation before university.

PROJECTS

First versions built in 2025 and early 2026; rebuilt in November 2026 with an AI coding assistant, as each repository's history shows.

TechZone: a PC-parts marketplace github.com/ghulamnabi-dev/TechZone
PHP 8, MariaDB, JavaScript

- Storefront, a PC builder that checks part compatibility on the server, and a back-office with order timelines and a stock ledger.
- Checkout runs in one transaction with locked rows: a CI test sends 12 simultaneous checkouts for 3 units and requires exactly 3 orders.
- CI boots the real stack on every push and calls the real endpoints.

PhoneBook: a contacts system with accounts github.com/ghulamnabi-dev/PhoneBook
ASP.NET Core 9, EF Core, Angular 19

- Repository and unit-of-work pattern with explicit transactions; vCard import is all or nothing.
- Each user sees only their own data, proven by tests that sign in as two people; 36 server tests.

Mohalla: finances for a housing society github.com/ghulamnabi-dev/mohalla
ASP.NET Core 9, SQL Server, Hangfire, Angular 19

- Monthly ledger generated by a scheduled job, resident statements, and admin and viewer roles enforced by the server.

Shotwise: a pipeline for AI story series (in progress) github.com/ghulamnabi-dev/shotwise
Python, FastAPI

- Each stage has a fallback chain that ends in a manual step, so a long run can finish when a model is unavailable.

Sentinel Flux Core: mapping floods from satellite radar **2026**
Final-year project, team of four (Python)

- Team coordinator and documentation lead; designed the command-line tool that runs every stage. The detection and classification code is the team's work.

SKILLS

Languages: C#, TypeScript, JavaScript, Python, PHP, SQL, C++.
Back end: ASP.NET Core, Entity Framework Core, REST APIs, SQL Server, MariaDB.
Front end: Angular, HTML, CSS.
Practices and tools: Git, pull requests and code review, automated testing, dependency auditing, Linux.
Spoken languages: Urdu and Punjabi (native); English (C1, self-assessed); German (A1).

EDUCATION

The University of Lahore, Pakistan **Feb. 2023 – Jan. 2027 (expected)**
B.S. Computer Science, seven of eight semesters completed *CGPA: 3.72/4.00*

HONOURS AND CERTIFICATIONS

Dean's Honour List: Faculty of Information Technology, The University of Lahore, Fall 2023.
Cyber Security Internship Certificate: Allied Software Engineers, Aug. 2026.
Crash Course on Python: Google via Coursera, July 2025.
