Ghulam Nabi

Lahore, Pakistan | ghulamnabi7885@gmail.com | ghulamnabi-dev.github.io
github.com/ghulamnabi-dev | linkedin.com/in/ghulam-nabi-67b558374

RESEARCH INTERESTS

Software engineering and reliable systems; software security and applied cryptography; evaluation of machine-learning systems.

EDUCATION

The University of Lahore, Pakistan **Feb. 2023 – Jan. 2027 (expected)**
B.S. Computer Science, seven of eight semesters completed *CGPA: 3.72/4.00*

- Relevant coursework: Information Security (in progress), Computer Networks (A), Operating Systems (B+), Data Structures and Algorithms (A-), Database Systems (A-), Artificial Intelligence (A).

EXPERIENCE

Awatech Technology Solutions **Sep. 2025 – Present**
Software Engineer *Lahore, Pakistan*

- Develop ERP modules in ASP.NET Core and Angular used by more than 100 people: REST endpoints, forms and dashboards, SQL Server schema migrations.
- Track and resolve vulnerable front-end dependencies through dependency auditing and controlled Angular upgrades.

Allied Software Engineers (Pvt) Ltd **Jul. – Aug. 2026**
Cyber Security Intern *Remote*

- Eight-week programme covering vulnerability assessment, security monitoring, secure configuration and incident response.
- Wrote detection rules for a lab scenario (five Sigma rules mapped to MITRE ATT&CK, two YARA rules, Sentinel and Splunk queries) and Bash scripts for a Linux audit. Not run against real logs or samples.

Awatech Technology Solutions **Jul. 2024 – Aug. 2025**
Software Development Intern *Lahore, Pakistan*

- Built CRUD applications with .NET, Angular and SQL Server in a Git workflow with pull requests and review.

Petsaal Technologies **Sep. – Dec. 2022**
SEO Intern *Lahore, Pakistan*

- Technical and on-page search optimisation before university.

RESEARCH PROJECTS

Sentinel Flux Core: mapping floods from satellite radar **2026**
Final-year project, team of four *Python*

- Maps flood extent from Sentinel-1 radar images. Evaluated with each area held out of training: macro F1 0.874 on 14 areas of the Pakistan 2022 floods, and 0.743 on the 5 areas with official emergency maps.
- Role: team coordinator and documentation lead; designed the command-line tool. The detection and classification code is the team's work.

Digital Well-being: a private mental-health check-in for students **2026**
Self-initiated study, design stage

- Led the design of a check-in built on the PHQ-9 and GAD-7 screening questionnaires. It screens and never diagnoses. The app is not built, and no student data will be collected before ethics approval.

PROJECTS

First versions built in 2025 and early 2026; rebuilt in November 2026 with an AI coding assistant, as each repository's history shows.

TechZone: a PC-parts marketplace github.com/ghulamnabi-dev/TechZone
PHP 8, MariaDB, JavaScript

- Sign-in, sessions, request-forgery protection and access control in plain code with no framework, using standard building blocks only.
- Checked on every push: a cross-origin request is rejected, no API response contains a password field, and 12 simultaneous checkouts for 3 units produce exactly 3 orders. Known gaps are documented in the repository.

PhoneBook: a contacts system with accounts github.com/ghulamnabi-dev/PhoneBook
ASP.NET Core 9, Angular 19

- Per-user data isolation tested by signing in as two people; tokens authenticated with HMAC-SHA256; all-or-nothing file import; 36 server tests.

Mohalla: finances for a housing society github.com/ghulamnabi-dev/mohalla
ASP.NET Core 9, SQL Server, Angular 19

- Admin and viewer roles enforced by the server on every write; monthly ledger generated by a scheduled job.

SKILLS

Security: Dependency auditing, vulnerability assessment, log analysis, network monitoring, Sigma and YARA rules, Burp Suite and Metasploit (lab use), Linux.

Programming: C#, TypeScript, JavaScript, Python, PHP, SQL, C++.

Frameworks and tools: ASP.NET Core, Entity Framework Core, Angular, SQL Server, MariaDB, REST APIs, Git.

Languages: Urdu and Punjabi (native); English (C1, self-assessed); German (A1).

HONOURS AND CERTIFICATIONS

Dean's Honour List: Faculty of Information Technology, The University of Lahore, Fall 2023.

Cyber Security Internship Certificate: Allied Software Engineers, Aug. 2026 (ASE/INT/2026/08939).

Crash Course on Python: Google via Coursera, July 2025.

Leadership Program: UOL Student Guild, academic year 2024–25.
